Potential Environmental Impacts:

No Environmental impact

Action Taken or Planned:

Block valve was immediately shut to stop the flow of therminol. Impacted soil will be removed.

Wastes Disposal Location: certified disposal

Agencies Involved:

Updates

Date: 3/30/2016 **Status:** Reviewed - Follow-up Required

Author: Stockdill, Scott

Updated Volume:

Notes:

According to the incident summary, this spill impacted areas not associated with an E & P location. Follow-up is necessary.

Date: 4/20/2016 **Status:** Inspection

Author: O'Gorman, Brian

Updated Volume:

Notes:

Arrived on location at 12:45. 59 degrees F, partly cloudy, west wind 0-10 mph. Met with Byron Skaley (environmental specialist) who took me through their operational risk management (ORM) training and drove me to the release location. Took photos and observed the site. It appeared the release had been removed and new soil/gravel added to the area. Recommend no further follow-up needed at this time.
